QBank for the JEE MAIN

IndiaQBank
QBank for the JEE MAIN
Question 3 of 7

Case
Match the properties and their compounds.

Column - I	Column - II
(A) Colourless crystalline compound soluble in H_2O and alcohol. When exposed to light, it decomposes, hence stored in a brown coloured dark bottle.	(i) Silver nitrate
(B) On thermal decomposition it forms two gases and sediment. With H_2O_2 , this compound uses as the Fenton's reagent.	(ii) Green nitrate
(C) I_2 is produced if excess of H_2 is added to an acidified solution of this compound.	(iii) Lead azide
(D) This can be prepared by treating Hg with aqua-regia. It is highly soluble in hot water, ether and alcohol.
